CRL Remote Handling Solutions

Robotic Tooling Solutions

DESTACO, a Stabilus Group company, is a global leader in the design and manufacture of high-performance automation, workholding and remote-handling solutions. The company serves customers in a variety of end-markets, including the automotive, life sciences, consumer packaged goods, aerospace, industrial and nuclear sectors.

Built on a legacy of more than 100 years, DESTACO offers a comprehensive portfolio of products designed to engineer precise movement, placement and control solutions that drive productivity and uptime for manufacturers around the world. The DESTACO family of products consists of industry-leading brands such as DESTACO Manual Clamps, Power Clamps, and End Effectors; CAMCO™ and Ferguson™ Indexers; Robohand™ Grippers; and CRL™ Manipulators and Transfer Ports.

DESTACO is based in Auburn Hills, Michigan, U.S.A. The company has more than 800 employees with 13 locations, in 9 countries, across the Americas, Europe and Asia.

Stabilus is one of the world's leading providers of motion control solutions for customers across a broad spectrum of industries including mobility, industrial machinery, automation, energy, construction, health, recreation, and furniture. Stabilus offers reliable and innovative solutions that enable, enhance and automate precise movement, placement, as well as opening, closing, lifting, lowering and adjusting actions. The Group, which has its headquarters in Koblenz, has a global production and distribution network with more than eight thousand employees worldwide and generated revenues of €1.3 billion in the 2024 fiscal year. Stabilus SE is listed in the Prime Standard segment of the Frankfurt Stock Exchange and included in the MDAX index.

Why Destaco Clamps?

As the original patent holder of the toggle clamp, Destaco continues to develop toggle clamps designed to last for several years of service. While providing a diverse offering of clamping actions, ease of use and safety remains central to our product development.

Destaco continues to be innovator of several industry firsts, and have many active US and international patents

- Ergonomic handles for greater operator comfort and control
- Our safety link helps prevent accidental injury during opening
- Exclusive handle design gives more clearance between handle and bar when clamp is fully open

Destaco Toggle Lock Plus

This is an optional locking release lever that helps ensure that the over-center locking condition is maintained. Adding this feature expands the range of applications Destaco clamps can be used.

- Optionally available for increased safety
- Locks clamp in closed, extended or latched position
- No accidental or unintentional opening

Stainless Steel Models

Destaco offers toggle clamp models fabricated with corrosion, chemical and heat resistant stainless steel. These clamp models are used in many applications where corrosion is a problem

- Smooth surfaces without burrs
- Rivets made of stainless steel
- Stainless steel spindles with hex heads

Heavy Duty Clamping

Destaco offers heavy-duty versions of nearly every clamp type in its portfolio. These models are designed to push the upper limits of performance with very high holding capacities and withstand harsh manufacturing environments.

- Hardened steel pivot pins and bushings provide long life
- High strength forged clamping arms and hardened plungers
- Weldable clamp models available.

Vertical Hold Down Action Clamps

Holding capacities: 100lbf up to 6000lbf

The vertical hold down clamps are identified by their vertical handles. The hold down bar (also called the clamping bar) exhibits a minimum 90 degree opening angle.

- Solid or "U" shaped clamping arm
- Straight or flange base mounting
- Stainless steel and heavy-duty models
- Optional T-handle
- Destaco® Toggle Lock Plus.

100+ Models Available

"U" Bar for adjustable spindle location

"S" Bar for fixed clamping and customized attachments

Flange Base Mount for secure surface mounting

Straight Base Mount for blade mounting

Horizontal Hold Down Action Clamps

Holding Capacities: 60lbf up to 2400lbf

The outstanding characteristic of the Horizontal Hold down clamp is the low height design. Unlike the movement of the vertical clamps, the horizontal clamps move in opposite direction.

- Solid or "U" shaped clamping arm
- Straight or flange base mounting
- Stainless steel and heavy-duty models
- Destaco® Toggle Lock Plus.

70+ Models Available

STRAIGHT LINE ACTION AND PULL ACTION CLAMPS

Straight Line Action (Plunger) Clamps

Holding Capacities: 100lbf up to 16000lbf

Plunger Travel: 0.63in up to 4.00in

The handle is easy to operate and moves the plunger of the clamp in and out along its axis. Almost all of these can be locked in two positions, allowing you to use them as either push or pull clamps.

- Imperial and metric internal threads
- Stainless steel and heavy-duty models
- Several mounting and plunger options available
- Variable stroke models available
- Destaco® Toggle Lock Plus.

70+ Models
Available

Pull Action (Latch) Clamps

Holding Capacities: 200lbf up to 7500lbf

The handle is used to move and place the clamping pull bar (hook) around the opposing latch, then pulling back to reach the locked position. Ideal for sealing chamber doors or mold closures, this clamp provides a powerful closing force, positive holding and convenient single-handed operation.

- "J" hook and "U" hook type bars offered
- Stainless steel and heavy-duty models available
- Multiple mounting and hook length options
- Destaco® Toggle Lock Plus.

50+ Models
Available

Squeeze Action (Plier) Clamps

Holding Capacities: 100lbf up to 1200lbf

These clamps are used wherever permanent or stationary clamping is not possible, making them a flexible clamping and fixturing solution. The clamp jaws lock automatically when closing, as one or both handles are squeezed against the central position. Some models feature the Destaco trigger release for easy one-hand opening.

- Drop forged, heat-treated alloy steel
- Several jaw types available
- Supplied with one or two adjustable spindles
- Swivel foot spindle available for angular surfaces

20+ Models Available

Pneumatic Toggle Clamps

Holding Capacities: 100lbf up to 16000lbf

Most of the products in this group are air-actuated, cylinder-driven versions of manual toggle clamps. They are ideal for quick and repetitive applications.

- Hold-down and straight-line action
- Solid and "U" bar clamping arms
- Low profile and compact models available for mounting in tight spaces.
- Heavy-duty models available
- Fully enclosed models available
- Sensor ready

30+ Models Available

Pneumatic Lever and Swing Clamps

Clamping Force: Up to 321lbf

Swing clamps provide quick swing-and-clamp movement, where the clamping arm first pivots 90 degrees before drawing down on the workpiece.

The lever clamp arm pivots up and out of the way within its mounting footprint. All styles can be used to increase productivity while working in tight spaces.

- Several mounting and clamping arm options
- Right or left swing, or straight clamping action
- Threaded body options for through-hole mounting
- Models with constant clamping force over a range of part thickness available

30+ Models Available

Pneumatic Power Cylinders

Clamping Power Force: Up to 13490lbf

Power cylinder operation is based on the wedge lever principle, using a double-acting, two-step stroke function. The forward stroke to move a certain distance and a power stroke providing an amplified force within a short distance.

- Maximum mechanical advantage up to 10:1
- Male threaded or female ISO fit rod end
- Optional end position control with magnetic field sensors
- Double piston rod design option prevents twisting during stroke

70+ Models Available

Hydraulic Workholding Solutions

Holding Capacities: Up to 12066 lbf

Hydraulic clamping products provide powered workholding solutions where greater clamping forces combined with fast, repeatable and reliable actuation is needed. When used with an air/oil booster, these solutions offer an affordable way to get the power of a hydraulic system with the use of existing shop air supply.

- Single and double-acting swing/pull clamps and threaded body cylinders
- Threaded body for through-hole mounting
- Thru-hole hydraulic rams can actuate a rod of any length or shape.
- Air/oil booster converts normal shop-line air pressure to high-pressure hydraulic power

25+ Models Available

Pneumatic Round Bore Power Clamps

Clamping Torque up to 420Nm

Holding Torque up to 1800Nm

Designed for high production applications, these toggle action pneumatic clamps offer exceptional clamping forces and holding capacities - far greater than those of similar size. These clamps do not require greater pressure to open than to close.

- Clamp arms can be ordered in vertical or horizontal mount positions
- Mounting flexibility on all four sizes
- Magnetic sensing available

8 Models Available

Pneumatic and Manual Power Clamps

Clamping Torque up to 850Nm
Holding Torque up to 3000Nm

Enclosed power clamp arms pivot down to position and hold product securely in place. The clamping mechanism is fully enclosed making these clamps ideal for use in harsh environments such as welding applications that demand superior clamping power.

- A complete full line of clamps from light-duty to heavy-duty models available
- Oval cylinder for space-saving slim body profile
- Several center "U" and lateral arms available
- Field adjustable arm opening angles
- Manual actuated and Hand lever option available
- Integrated open/closed sensing

11+ Families
Available

TCC-2 Tolerance Compensating Power Clamp Features

- Tolerance compensation for variable sheet metal thicknesses within three degrees of arm movement
- There is no need for shimming

82M-3E & TCC-2 Cylinder Options

Standard Cylinder

Available for 82M and TCC Series Clamps

Cylinder with Internal Hold Open Device

Securely holds clamp in the open position
 Available for 82M and TCC Series Clamps

Cylinder with Unlockable Return Valve

Pneumatically holds clamp arm in the closed position when air is released
 Only available for TCC Series Clamps

Cylinder with Rod Locking Device

Uses friction to clamp rod at any point between open and closed positions

When an off-the-shelf product can't handle it - we can!.

With many years of experience working with OEM machine builders, we can make our product fit your unique application. We will partner with you to design the right product for your application – from altering an existing product to building a completely new product, we have the experience and expertise to help your project succeed.

Using our expertise to develop custom solutions for unique applications, Destaco helps you save time and resources, allowing you to focus on your core business and gain a competitive advantage in the marketplace.

- Proven quality from the experts
- Reduce risk by using our experienced engineers
- Easy reordering with unique part numbers
- Simplify your supply chain
- Three levels of customization from simple alterations to complex custom products

Model 330
Standard Product

330-201 Stainless steel clamp with special hook and locking tab

Model 2002-U
Standard Product

2002-200 with bar cut and bolt retainer welded on

Model 604
Standard Product

604-229 Stainless steel straight line clamp used in chemical machining process

Model 624/624-MM
Standard Product

624-MM-872 with modified handle and square plunger

Model 202
Standard Product

202-200 without grip, with imperial threaded spindle

Model 630-M
Standard Product

630-38 with electroless nickel plating

Model 802-U
Standard Product

802-U219 with handle for manual operation
